

■ MARKETING FUNNEL & CONVERSION ANALYSIS REPORT

● 1. PROJECT TITLE

Marketing Funnel & Conversion Performance Analysis

● 2. OBJECTIVE

The objective of this project is to analyze customer marketing funnel data, understand conversion behavior, identify drop-offs, and provide insights to improve marketing performance.

● 3. TOOLS USED

- Power BI Desktop 
- Data Cleaning & Transformation
- DAX (Calculated Columns)
- Data Visualization

● 4. DATASET DESCRIPTION

The dataset contains customer campaign data including:

- Age
- Job
- Marital Status
- Education

- Contact Type
- Campaign Outcome (Converted / Not Converted)

👉 Target Variable: y (Conversion Status)

🟡 5. DASHBOARD VISUALIZATIONS

📊 1. Conversion Analysis

Shows comparison between converted and not converted customers.

📊 2. Job-wise Analysis

Displays customer distribution across job roles.

📊 3. Customer Segmentation

Analyzes demographic patterns such as education and marital status.

🟣 KPI CARD

Displays total number of customers in the dataset.

🔴 6. KEY INSIGHTS

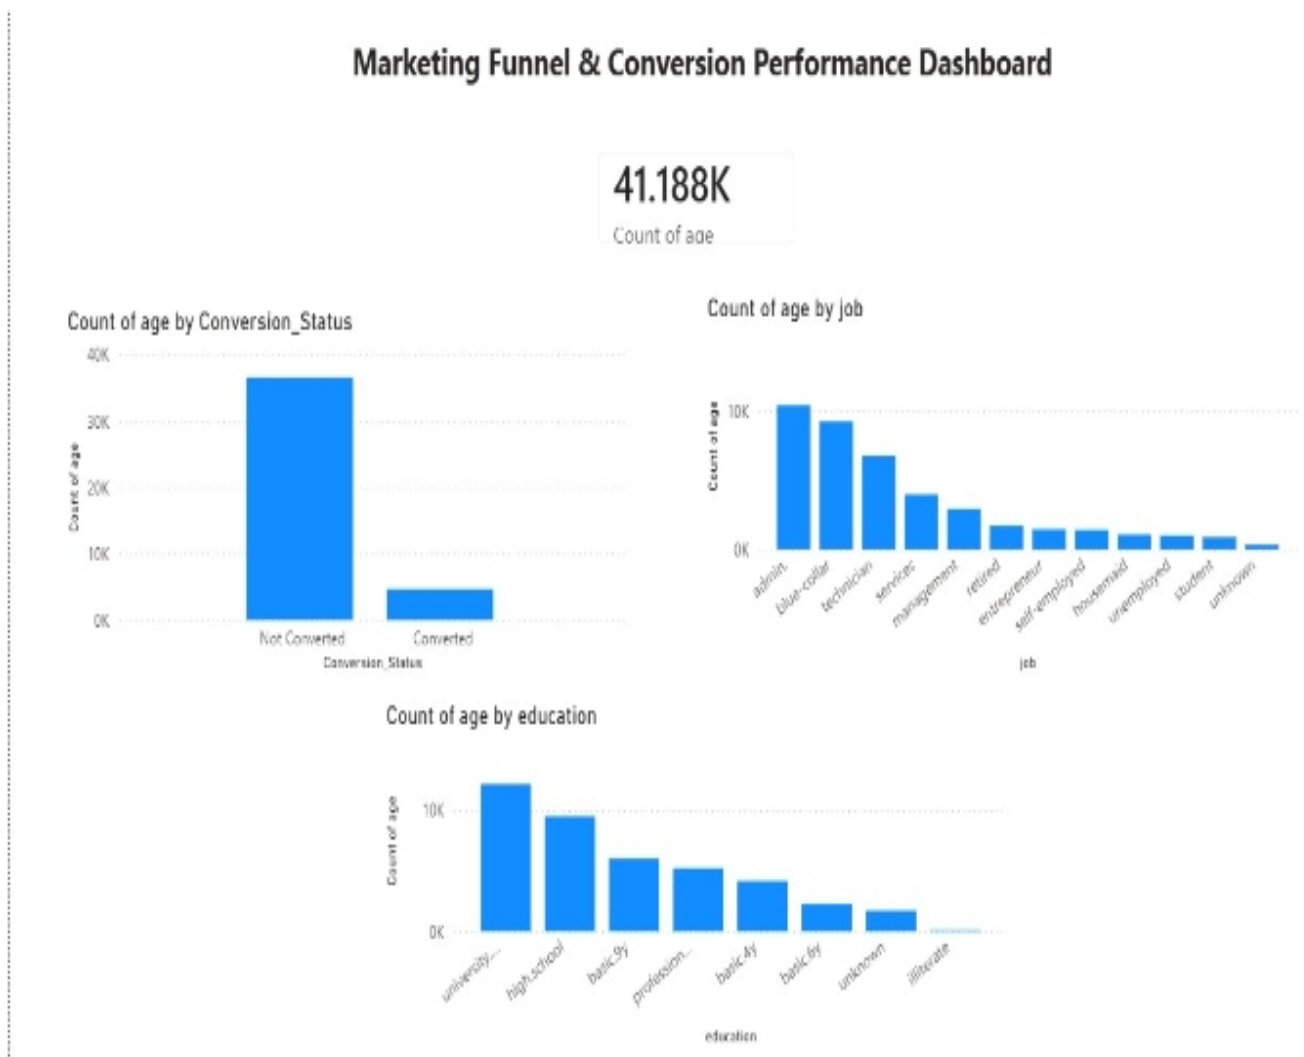

- Majority of customers did not convert
- Conversion rate is relatively low
- Admin and technician job roles show higher engagement
- Customer segmentation helps identify target audience clearly

- Marketing strategy needs better targeting for improvement

7. CONCLUSION

The marketing funnel analysis helps understand customer behavior and conversion patterns. These insights can be used to optimize marketing strategies, improve targeting, and increase conversion rates in future campaigns.

8. DASHBOARD OUTPUT

✓ Full dashboard view

✓ Charts visible

✓ KPI card included
